9th INTERNATIONAL BLACK SEA MODERN SCIENTIFIC RESEARCH CONGRESS

August 1-3, 2026 - Düzce, Türkiye

05.08.2026

REF: Akademik Teşvik

İlgili makama;

9. Uluslararası Karadeniz Modern Bilimsel Araştırmalar Kongresi, 1-3 Ağustos 2026 tarihleri arasında Düzce’de 32 farklı ülkenin (Türkiye 109 bildiri- Diğer ülkeler 127 bildiri) akademisyen/araştırmacılarının katılımıyla gerçekleşmiştir

Kongre 16 Ocak 2020 Akademik Teşvik Ödeneği Yönetmeliğine getirilen “Tebliğlerin sunulduğu yurt içinde veya yurt dışındaki etkinliğin uluslararası olarak nitelendirilebilmesi için Türkiye dışında en az beş farklı ülkeden sözlü tebliğ sunan konuşmacının katılım sağlaması ve tebliğlerin yarından fazlasının Türkiye dışından katılımcılar tarafından sunulması esastır.” değişikliğine uygun düzenlenmiştir.

Bilgilerinize arz edilir,

Saygılarımla

Assoc. Prof. Dr. Abbas KARAAĞAÇLI
Organizing Board

2. ÇALIŞMA ALANI VE VERİ

Bölge ve Veri Setleri

ÇALIŞMA ALANI

Doğu Ege Denizi, mevsimsel atmosferik zorlamanın (kış fırtınaları, yaz Etezyen rüzgarları) baskın olduğu yarı kapalı bir havzadır.

VERİ SETLERİ

- Menteş Gel-Git İstasyonu (TUDES) — günlük gel-gitsiz kalıntı deniz seviyesi
- CMEMS Akdeniz Fizikî Reanalizi — $1/24^{\circ}$ çözünürlük, günlük
- Ortak gözlem dönemi: 2004–2012, 3.293 gün

ORTAK GÖZLEM SÜRESİ

3.293

GÜN (2004 - 2012)

Yöntem: Datum farklarını gidermek için ortak dönem uzun-vadeli ortalaması her iki seriden çıkarılarak günlük anomalî serileri oluşturuldu.

3. WAVELET ANALİZİ SONUÇLARI

Ereğli (açık hava) ve Yalova (kapalı körfez) istasyonları – 2014 yılı

WAVELET ANALİZİ YÖNTEMİ

Sinekli Dalgacık Dönüştürme (CWT), Akdeniz kıyılarında deniz seviyesi zaman serilerinin zaman-çekim (ölçek) periyodu (çapraz enerji) değişimlerini analiz eder. Bu yöntem, sinyallerin periyodik bileşenlerini zaman içindeki değişimlerini ortaya koyar.

ANALİZDE İNCELENEN PERİYOT BANTLARI

- Kısa periyotlar (2 – 24 saat): Rüzgar değişimleri, yerel atmosferik kirlilik, meteorolojik etki.
- Orta periyotlar (24 saat – 2 hafta): Güneşten gelen ışınım günlük modülasyonu, atmosferik salınım.
- Uzun periyotlar (2 hafta – 2 yıl): Mevsimsel salınım, diğer faktörler etkilerini göstermektedir.

TEMEL BULGULAR

- Her iki istasyonda da en güçlü enerji uzun periyotlarda (1-10 yıl) gözlemlenmiştir.
- Ereğli istasyonu kısa ölçekli enerji daha geniş periyot aralığında ve daha yüksek enerjilerde gözlemlenmiştir.
- Yalova istasyonu enerji daha dar bantlı yapıya sahiptir, ancak yüksek periyot enerjisi daha azdır.
- Kısa periyot enerji (2-24 saat) her iki istasyonda da benzer şekilde gözlemlenmiştir.
- Orta periyot enerjisi (2 hafta - 2 yıl) arasında benzerlik gözlemlenmiştir.

SONUÇ

Wavelet analizi, CMEMS reanaliz verileri ile TUDES gözlemlerinin farklı ölçekli periyotları arasındaki tutarlı sinyalleri tespit etmektedir. Uzun periyot bileşenleri mevsimsel değişkenliği baskın şekilde temsil ederken, kısa periyot bileşenleri atmosferik etkilerin anlık ve sürekli değişimini ortaya koymaktadır.

Why Reverse Osmosis?

Accounts for 69% of global desalination capacity High salt rejection efficiency (> 99%) Lower energy demand than thermal processes

Main Challenges

- Membrane fouling
- Energy consumption
- Brine disposal
- Long-term water quality stability

Research Focus : Long-term stability of desalinated water quality under real operating conditions

TCDD, TO kongre_sunumu_notlar_düzenlenmiş (2).pptx • Son Değiştirme Zamanı: 25 dakika önce

Literatürde TCDD'nin pankreas etkileri bildirilmiştir; ancak ekzokrin-endokrin hasar ve apoptotik yanıtın birlikte değerlendirilmesi sınırlıdır.

Literatürde TCDD'nin pankreas üzerindeki etkilerine ilişkin deneysel bulgular vardır; ancak çalışmalar çoğunlukla farklı doz, süre ve hedef sonuçlar kullanmıştır. (9,10).

Ekzokrin Sistem (Asiner hücreler)

- Sindirim enzimini üreten asiner hücrelerden oluşur. (13).
- TCDD maruziyetiyle asiner hasar, dejenerasyon, nekroz ve inflamasyon gelişebilir. (14,15).

Endokrin Sistem (Langerhans adacıkları)

- Langerhans adacıkları glukoz homeostazında rol oynar. (17).
- Toksik maruziyet endokrin hücre hasar ve apoptotik yanıtı tetikler. (17,18).

Bu çalışmanın amacı

- 30 günlük TCDD maruziyeti sonrası ekzokrin ve endokrin pankreas hasarını aktif olarak 3 ile birlikte değerlendirmek.
- Timokinin eş uygulamasının bu değişiklikler üzerindeki olası koruyucu etkisini araştırmak.

Future Perspectives

- * Identification of reliable ferroptosis biomarkers for patient selection.
- * Development of safer and more selective ferroptosis-inducing agents.
- * Integration of ferroptosis with immunotherapy and targeted therapies.
- * Personalized treatment strategies based on tumor molecular profiling.
- * Validation through large-scale clinical trials before routine clinical application.

BIOMARKERS
Identification of reliable ferroptosis biomarkers for patient selection.

NOVEL FERROPTOSIS INDUCERS
Development of safer and more selective ferroptosis-inducing agents.

COMBINATION STRATEGIES
Integration of ferroptosis with immunotherapy and targeted therapies.

ADVANCED DRUG DELIVERY SYSTEMS
Nanotechnology and smart delivery systems to improve selectivity, efficiency and reduce toxicity.

CLINICAL VALIDATION
Validation through large-scale clinical trials before routine clinical application.

FUTURE BREAST CANCER TREATMENT

PERSONALIZED MEDICINE
Personalized treatment strategies based on tumor molecular profiling and patient characteristics.

Endocrine Disruption and Thyroid Axis

Juvenile zebrafish exposed to 100 µg/L Naproxen for 60 days demonstrate significant disruption of the hypothalamic-pituitary-thyroid (HPT) axis.

Biological Marker	Control Group	100 µg/L NPX (60d)	Status
Thyroxine (T4) Levels	~11 ng/g	~5 ng/g	▼ 54% Reduction
Thyrotropin (TSH)	Baseline	~2.0x Control	▲ 100% Increase
Overall Growth	Normal Development	Significantly Stunted	

Downregulation of DIO1 and DIO2 genes

Disruption of peripheral T4-to-T3 conversion

❖ **Lactobacillus reuteri Intervention**
Partial attenuation of T4 decline and growth impairment observed with probiotic treatment, though outcomes did not fully normalize to control levels.

Visual schematic: 60-day exposure profiling of bioconcentration and HPT axis disruption

Salt Yönetimden Etkili Liderliğe Geçiş

Yönetici (Sistem Odaklı)

- Mevcut düzeni devam ettirir ve koruyucu davranır.
- Kısa vadeli bakış açısıyla "Nasıf?" ve "Ne zaman?" sorularına odaklanır.
- Yerleşik normlara uyum gösterenler için "güvenli" hedefler.

Lider (İnsan Odaklı)

- Fark oluşturur, yenilik üretir ve geliştirici davranır.
- Uzun vadeli bakış açısıyla "Ne?" ve "Ne için?" sorularına odaklanır.
- Ekip arkadaşlarını geliştirip onları "doğru işi yapmaya" yönlendirir.

Participant Countries (32):

TÜRKİYE, ETHIOPIA, USA, VIETNAM, AFGHANISTAN, ALBANIA, ALGERIA, AZERBAIJAN,
BOTSWANA, CHINA, COLOMBIA, GEORGIA, INDIA, INDONESIA, IRAN, ISRAEL, JORDAN,
KOREA, KOSOVO, LEBANON, MALAYSIA, MOLDOVA, MOROCCO, NEW ZEALAND, NIGERIA,
PAKISTAN, ROMANIA, RUSSIA, SAUDI ARABIA, SERBIA, UNITED KINGDOM, TRNC

ÖNEMLİ, DİKKATLE OKUYUNUZ LÜTFEN

IMPORTANT, PLEASE READ CAREFULLY

Önemli, Dikkatle Okuyunuz Lütfen

- ✓ Kongremizde Yazım Kurallarına uygun gönderilmiş ve bilim kurulundan geçen bildiriler için online (video konferans sistemi üzerinden) sunum imkanı sağlanmıştır.
- ✓ Online sunum yapabilmek için <https://zoom.us/join> sitesi üzerinden giriş yaparak “Meeting ID or Personal Link Name” yerine ID numarasını girerek oturuma katılabilirsiniz.
- ✓ Zoom uygulaması ücretsizdir ve hesap oluşturmaya gerek yoktur.
- ✓ Zoom uygulaması kaydolmadan kullanılabilir.
- ✓ Uygulama tablet, telefon ve PC’lerde çalışıyor.
- ✓ Her oturumdaki sunucular, sunum saatinden 15 dk öncesinde oturuma bağlanmış olmaları gerekmektedir.
- ✓ Tüm kongre katılımcıları canlı bağlanarak tüm oturumları dinleyebilir.
- ✓ Moderatör – oturumdaki sunum ve bilimsel tartışma (soru-cevap) kısmından sorumludur.

Dikkat Edilmesi Gerekenler- TEKNİK BİLGİLER

- ✓ Bilgisayarınızda mikrofon olduğuna ve çalıştığına emin olun.
- ✓ Zoom’da ekran paylaşma özelliğine kullanabilmelisiniz.
- ✓ Kabul edilen bildiri sahiplerinin mail adreslerine Zoom uygulamasında oluşturduğumuz oturuma ait ID numarası gönderilecektir.
- ✓ **Katılım belgeleri kongre sonunda tarafınıza pdf olarak gönderilecektir**
- ✓ Kongre programında yer ve saat değişikliği gibi talepler dikkate alınmayacaktır

IMPORTANT, PLEASE READ CAREFULLY

- ✓ To be able to attend a meeting online, login via <https://zoom.us/join> site, enter ID “Meeting ID or Personal Link Name” and solidify the session.
- ✓ The Zoom application is free and no need to create an account.
- ✓ The Zoom application can be used without registration.
- ✓ The application works on tablets, phones and PCs.
- ✓ The participant must be connected to the session 15 minutes before the presentation time.
- ✓ All congress participants can connect live and listen to all sessions.
- ✓ Moderator is responsible for the presentation and scientific discussion (question-answer) section of the session.

Points to Take into Consideration - TECHNICAL INFORMATION

- ✓ Make sure your computer has a microphone and is working.
- ✓ You should be able to use screen sharing feature in Zoom.
- ✓ **Attendance certificates will be sent to you as pdf at the end of the congress.**
- ✓ Requests such as change of place and time will not be taken into consideration in the congress program.

Before you login to Zoom please indicate your name_surname and HALL number,
exp. Hall-1, Merve KIDIRYUZ

ABSTRACT

Aerodynamic performance evaluation of aircraft wings is a critical stage in aircraft design due to its direct influence on lift generation, flight stability, and overall efficiency. Computational Fluid Dynamics (CFD) methods provide an effective approach for predicting flow characteristics around airfoil geometries before experimental testing. Therefore, the objective of this study was to numerically investigate the aerodynamic behavior of the NACA 64A206 airfoil using ANSYS Fluent by evaluating velocity distribution, pressure variation, and lift coefficient characteristics.

In this study, the NACA 64A206 airfoil geometry was generated using coordinate data and modeled within the ANSYS environment. A two-dimensional computational flow domain was created, and the airfoil geometry was separated from the fluid region using Boolean operations. Mesh generation was performed with refined edge sizing around the airfoil surface to increase the accuracy of the numerical solution. After defining inlet, outlet, and airfoil boundary conditions, CFD simulations were carried out using ANSYS Fluent. The aerodynamic behavior of the airfoil was examined through velocity magnitude contours, static pressure distributions, flow vectors, and lift coefficient calculations.

The numerical simulation successfully demonstrated the airflow characteristics and aerodynamic performance of the NACA 64A206 airfoil. The velocity distribution showed flow acceleration around the airfoil surface, with a maximum velocity magnitude of approximately **1.86 m/s**. The static pressure distribution varied between approximately -1.26 Pa and 0.49 Pa, demonstrating the pressure difference mechanism responsible for aerodynamic lift generation. The calculated lift coefficient was approximately 0.666 , confirming that the selected airfoil geometry provided effective lift performance under the analyzed flow conditions.

The results indicate that ANSYS Fluent is an effective numerical tool for predicting aerodynamic characteristics of aircraft wing profiles. The obtained velocity and pressure distributions clearly demonstrated the relationship between flow behavior and lift generation mechanisms. This CFD-based methodology can be further extended by investigating different airfoil profiles, angles of attack, and flow velocities to improve aerodynamic optimization processes in aircraft wing design.

9th | INTERNATIONAL BLACK SEA MODERN SCIENTIFIC RESEARCH CONGRESS

August 1-3, 2026 / Düzce, Türkiye

The Black Sea region has been a bridge between civilizations throughout history and a center of scientific, cultural, and economic interaction. The International Black Sea Modern Scientific Research Congress aims to bring together innovative academic studies in various scientific disciplines, to discuss the latest developments, and to evaluate their impact on society.

This congress provides an interdisciplinary platform for researchers, academicians, professionals, and students to present their work, exchange knowledge, and establish new collaborations.

COLLABORATION

Strengthen academic networks

INNOVATION

Encourage innovative approaches

GLOBAL PERSPECTIVE

Address global challenges with regional insights

IMPACT

Create sustainable scientific impact
